COMPESO

WinTICKET Version	Status
WinTICKET – 9.00.0610	Released
WinTICKET – 9.00.0605	Released
WinTICKET – 9.00.0600	Released
WinTICKET – 9.00.0595	Released
WinTICKET – 9.00.0590	Released

IMPORTANT! With version 9.00.0535, **SQL Server versions < 2012 and Windows Server < 2016** are rejected by WinTICKET. From this version onwards, the update will check the SQL server and Windows Server version and cancel it if necessary.

If you are still using an older version of the SQL server and are planning an update of WinTICKET with an earlier release (9.00.0515 - 9.00.0530), please be sure to contact our support **before starting the WinTICKET update**, as we found compatibility problems here. We can work with you to prevent these problems before the update starts!

WinTICKET Version 9.00.0515 is the last version wich supports
- **Microsoft Windows Server 2012 R2**
- **Microsoft Windows 8.1**
- **Microsoft SQL Server 2008**
- **Microsoft SQL Server 2008 R2**

WinTICKET support for the above-mentioned systems will end on December 31, 2023. No further compatibility tests will be carried out for later WinTICKET versions. COMPESO can no longer guarantee that WinTICKET can be operated on these systems after an update to version > 9.00.0515.
